DID YOU KNOW?

Environmental Design Group has a dedicated team of water resource professionals that specialize in camp and campground infrastructure, especially drinking water, sanitary and stormwater facilities.

We provide affordable solutions for water distribution, sanitary collection, stormwater management and low flow water and wastewater treatment facilities for camps and campgrounds.

WHY CHOOSE US

Environmental Design Group has proven negotiating skills with regulatory agencies to save you money in capital costs.

1

Our collaborative planning and design approach balances resiliency and functionality.

2

We can show you how to experience long-term savings with practical on-going and future operations and maintenance.

3

SINCE 1984, we have been making lasting community impacts that improve the well-being of people and communities. We stand as a positive force, providing professional planning, design and engineering services to shape, define, utilize, conserve and restore land and water resources. We are the community impact people.
