CITY OF OBERLIN ECONOMIC DEVELOPMENT ASSISTANCE

 ENVDESIGNGROUP.COM

SCOPE OF SERVICE

Environmental Design Group provided economic development consulting services. Additionally, the team developed the required materials for the site selection process including a branded community site binder and presentation. Environmental Design Group is working with the City's economic development team to prepare the All Ohio Future Fund application to secure funding for the site.

PROJECT DESCRIPTION

The City of Oberlin is a vibrant community in northeast Ohio with both historical charm and modern vitality. The community features an engaging mix of recreational activities, cultural attractions and commercial assets that create an attractive environment for both residents and businesses. The purpose of this project is to evaluate and optimize the property for development into an innovation park as it moves through the site selection process. The project focuses on securing funding for site infrastructure and subsequent necessary improvements to prepare it for possible end-users.

IMPACT

Site Selection Assistance services provided guidance to the City of Oberlin in their process to transform their property into a thriving innovation park, creating substantial long-term economic benefits for the community. This development initiative is positioned to generate new high-quality jobs, expand the local tax base, attract industry investments, and strengthen the region's competitive advantage in manufacturing and logistics.
