

LAKEWOOD PARK SOLSTICE STEPS

Awards

- ACEC Ohio, 2017 Engineering Excellence Honor Award
- ASLA Ohio Chapter, 2016 Merit Award Winner
- Greater Cleveland Trails and Greenways, 2016 Showcase Gold Medal

Scope of Service

Environmental Design Group developed a master plan and construction documents to create a place to celebrate the lake and its beauty. We also coordinated the Rule 13 permitting and construction administration for the project.

Project Description

The Lakewood Park Solstice Steps design overcomes obstacles of access and lakefront visibility by creating stunning steps that wrap the northwest corner of the park. It connects a new upper promenade with the lower walk through the continuation of its walkway to elevated areas of the park. Informal and formal seating is widely available throughout the structure, encouraging patrons to gaze at the beautiful lake.

Impact

- Increases the aesthetic value of the park
- Creates a gathering place for visitors
- Serves as a local and regional destination for supporting resident attraction and retention
